Install Value in Your Home!

Homes are built square, level and plumb ... *not* circular. Why have a circular pump liner that looks like it houses a pump? Introducing the patent pending 1-800-Busy Dog Basement Technologies® Water Grabber® Bull Dog™.

Water Grabber® Bull Dog™ with two pumps and top discharge.

Water Grabber® Bull Dog™ with solid lid, hidden pipes and wires.

Standard Water Grabber® Bull Dog™ with single pump and top discharge with Ranger™ drain.

Your home deserves beauty and who wants a sump pump

1-800 Busy Dog Basement Technologies® is proud to introduce our revolutionary new Water Grabber® - the "Bull Dog™"! Our unique patent pending sump pump system represents an innovative alternative to the common circular or "open pit" pumping unit. Our "liner" which houses the pump in and under the ground has a SQUARE lid! 1-800-Busy Dog Basement Technologies® research and development department continues to "think outside the box", and in this case, "inside the box" and as a result ... the new Water Grabber® Bull Dog™ has arrived!

The pumping unit that does not look like a pump.

"Cut away" view of the Double Bull Dog™ configuration with a Stallion Battery Backup and sealed lid. One pump is raised above the other on a patent pending special interior shelf with the pipes hidden.

Most people are familiar with the old circular design of sump pumps or "open pits" that other waterproofing companies seem content to use. Basement Technologies recognizes that to be a leader in the basement waterproofing industry, one must continually improve old products and introduce more efficient new ones.

The circular pump liner or "open pit" is simply not as aesthetically pleasing or as effective as our new liner ... Our answer to this out-of-style look and function is the Water Grabber® Bull Dog™.

Your basement was built square, level, and plumb - not circular, so why have a circular liner in a square corner which looks like a plumbing product?

Historically, a sump pump is located on a straight wall or in a corner. Doesn't it make sense to install a sump pump that fits snugly and attractively in your basement ... and emulates a building product look? - not a sump pump!

Why would we call our revolutionary new product the Bull Dog™?

... because that's exactly what it is! The Bull Dog breed combines characteristics like tenacity, loyalty, toughness and veracity ... all of which define our new patent pending sump pump with the added benefits of backups and secondary pumps and configurations ... this all can be accomplished without round liners or having ugly "buckets" that look like sump pumps.

A typical 1-800-Busy Dog Basement Technologies installation. Shown with top discharge and our Ranger™ drain.
